## BioPlus® 2B BioPlus® 2Bw

### Using BioPlus 2B

For years BioPlus® 2B has been a nutritional staple for nearly 50 million pigs. BioPlus 2B is an effective DFM that increases live weight gain and improves feed conversion efficiency when used in piglets and grow/finish. BioPlus 2B also helps:

- Improve overall intestinal health
- Improve ADG by nearly 6%
- Decrease mortality by 15%

BioPlus 2B is an effective means of helping balance bacterial populations in the intestinal tract to improve performance regardless of life stage.

### Using BioPlus 2Bw

Weanlings are especially susceptible to intestinal challenges. Some of these challenges are brought about by weaning, out-of-feed events, out-of-water events, vaccination, or moving. BioPlus 2Bw is a water soluble DFM treatment that works to help stabilize intestinal health during these periods by helping to improve feed intake and increase villus height (for absorption).

Together, BioPlus 2B and BioPlus 2Bw help provide a consistently healthy intestinal tract.

By reducing the potential for overgrowth of pathogenic organisms in the young tract, BioPlus 2Bw allows the animal time to begin making the transition to solid food which helps to get your weanlings off to a fast start.

### Results

Together, BioPlus 2B and BioPlus 2Bw provide a continuous and reliable means of helping maintain intestinal health — naturally. This consistency helps maintain improved feed intake, improved ADG, and overall animal health and performance.

Used in combination these products help producers attain high levels of performance through improved intestinal health in their pigs and improved business performance for their operations.

Get consistent and reliable production tools from Chr. Hansen, the world's microbial experts.

### Benefits:

- Reduce mortality
- Increase number of weaned pigs
- Increase weaned litter weight
- Increase average daily gain
- Improve sow performance
- Reduce salmonella shedding

### Features:

- Heat stable and pelletable
- Water soluble
- Packaged in thermal sealed bags for guaranteed viability
- Use with or without antibiotics
